

Project Profile

Euclid Corridor Transportation Project

Year:
2004 – 2008

Client:
Washington Group
International

Owner:
Greater Cleveland Regional
Transit Authority

Location:
City of Cleveland

Project Scope:

- Complete building-face, sidewalk and street reconstruction of Euclid Avenue between Public Square and University Circle (including specialized streetscape with public art displays)
- Exclusive bus lanes; one-lane directional traffic; pedestrian zone enhancements to include new sidewalks, passenger shelters at center median stations, pedestrian lighting, street trees and tree lawns
- Roadway reconstruction and design to create consistent curb lines, numbers and widths of travel lanes, upgraded street lighting, and crosswalks at intersections
- New bus maintenance facility
- Traffic signal equipment installation and signage
- Elimination of on-street parking and relocation of loading zones

Project Services:

- Preconstruction Services
- Contract Administration
- Resident Engineering Services
- Construction Inspection

Cost:
\$110 M
